

# PIZZA PARTY

Kyle and Katie are at the pizza shop. Their mom gave each of them \$10 to spend on lunch.

Using the menu, can you help them choose what to order?

1. Kyle wants a slice of pizza, fries and an ice cream cone. Does he have enough money to buy everything?
  - a. Yes
  - b. No
2. If Katie orders a slice of pizza and a slushee, how much money does she have left?
  - a. \$5
  - b. \$4
  - c. \$6
3. If Kyle and Katie decide to split an order of fries evenly, how much will each of them have to pay?
  - a. \$2.50
  - b. \$1.25
  - c. \$5.00
4. Kyle wants to buy Katie an ice cream cone but has already bought a slice of pizza with pepperoni, an order of fries and a can of soda. Does he have enough money leftover to buy the ice cream?
  - a. Yes
  - b. No
